

## Fill-Air Rocket™

Inflatable Packaging System

Our Fastest  
Inflatable  
Void Fill System

Introducing the Fill-Air Rocket™ inflatable void fill system, a void fill solution designed specifically to meet the needs of modern fulfillment. Drawing on decades of best-in-class inflatable void fill experience, the Fill-Air Rocket™ system is faster, simpler, lighter and better prepared for your packaging operations.

## Fill-Air Rocket™

Inflatable Packaging System

Our Fastest  
Inflatable  
Void Fill System

### UNRIVALED SPEED

The Fill-Air Rocket™ system produces 100 feet of inflatable void fill cushions per minute in a variety of sizes — fast enough to keep up with the most demanding packaging operations. The system creates bags instantaneously, operating at maximum capacity the moment it is turned on.

### SIMPLIFIED OPERATION

Simply plug in and load Fill-Air Rocket™ system with film to blast off. No shop air is required. Two new features ensure further foolproof operation: active film web tracking, which automatically improves the film feed and bag length detection, which stops the film in an ideal position every time. These guarantee consistent, optimally filled bags.

### SAVES VALUABLE SPACE

The Fill-Air Rocket™ system has a compact footprint (less than 1.5 sq. ft.) that makes it ideal for tabletop placement in decentralized environments. The system is fast enough to deliver packaging on-demand, but material can also be batched into bins and even delivered via our Jet Stream® delivery solution to feed multiple packers. An integrated, on-board, auto-replenishment sensor can be used to maintain a consistent supply of material at all times.

### RECYCLABLE AND REUSEABLE

The superior sealing technology and material strength of Fill-Air® packaging makes it highly reuseable. If material must be disposed, Fill-Air® packaging loses 99.3% of its volume when deflated.

Sealed Air is proud to partner with [how2recycle.info](http://how2recycle.info). Our Fill-Air Extreme™ bags can now be recycled at local store dropoff locations nationwide. Visit [how2recycle.info](http://how2recycle.info) for more information.

### VERSATILE FILM OPTIONS

Fill-Air Extreme™ and Fill-Air Extreme Efficiency™ films are available in three widths (8", 10" and 12") and can be converted to two different cushion lengths, creating six possible cushion sizes.
